

3rd INTERNATIONAL WEEK
Polytechnic Institute of Setubal
Focus on Learning

23-27 March 2010

Call for Papers

The Polytechnic Institute of Setubal is organizing its 3rd International Week, which will take place at 23-27 March 2010.

We have chosen **Focus on Learning** as the leading theme for the International Week. Accordingly, this theme should in some way permeate the presentations to be proposed.

The main aims of the event are:

- to promote internationalization and mobility at the IPS;
- to provide an international context for sharing knowledge and experiences;
- to create an opportunity for interaction and networking;
- to discuss approaches to student-centred learning.

The programme this year will include:

- Classes for students
- Sessions for teachers
- Working sessions with teachers
- Institutional presentations
- Visits to the IPS premises
- International dinner
- Cultural visit (on the 27th March)

We are happy to invite you to take part of our event by proposing a presentation (not less than 1 hour).

Presentations could include:

- Classes for students on a specific scientific topic which adopt student-centered methodologies as far as possible;
- Sessions for teachers aimed to present or debate teaching and learning approaches.
- Institutional presentations

Please, send your proposals until the **11th December 2009**.

We take the chance to kindly ask you to pass on this invitation to all people in your institution who might be interested.

If you have any further questions do not hesitate to contact us.

Yours faithfully,
The CIMOB-IPS team
