D e k a n

Prof. dr. sc. Zoran Grgić

Bastian Goldel is a new postdoc in the Department of Agricultural Zoology. He started his academic career with a Bachelor of Science in General Biology at the University of Erlangen – Nuremberg, Germany in 2005. After graduating he did a Master of Science in Biodiversity and Ecology at the University of Bayreuth, Germany. In 2013 he started his PhD in Ecology and Biogeography at Aarhus University in collaboration with Amsterdam University about the ecology and geography of functional traits in palms. After several months of working for a conservation organisation in South Africa for the protection of wild cheetahs he started to work in the bioenergy sector for the FAO – United Nations headquarters in Roma, Italy. Since beginning of January 2020 Bastian is employed by the University of Zagreb.
