The Mission
Faculty of Agriculture in Zagreb, as a leading institution, is dedicated to developing and implementing the highest quality research, teaching and service. Faculty of Agriculture in Zagreb is one of the leading higher education institutions in Croatia, in the region and in the European Union. Faculty of agriculture has contributed significantly to the economic development of Croatia and neighboring countries, and has made an important contribution to the society of the region and the world. The Faculty of Agriculture in Zagreb aims to be a leading institution in the field of agricultural sciences in the region and in the world.

General information on system of studies

Teaching

Fields held in three teaching methods:

• Lectures
• Seminars
• Laboratory (practice, field and laboratory, field)

Lectures

The lectures are held at the course, at the Faculty of Agriculture part of the lectures is done through lecture which consists of units of knowledge unit of the lecture developed in classes in the classroom, and are performed to a group of students in a lecture, where the teacher is the only speaker. The material for the preparation of the lecture is a book or other written or internet source or personal material (display of technological processes, personal research - experiment demonstrations, and other). Depending on the courses, part of the offices is written and published in the process of conducting the lecture, that are later reviewed and presented in the office as a thesis as well as doctoral dissertations of students of Faculty of Agriculture. Students are expected to write and present a written course practice and a laboratory practice which is commented during the course and at the end of the semester. Students who are unable to perform laboratory practice or absence of part of the classes and results in a lower grade, the seminar is not completed. Students must be present for the presentation and preparation of seminar topics. Through seminars, students have the opportunity to discuss the topics of the course and to present their own research work. The seminars are held at the Faculty of Agriculture in Zagreb, in the same premises as the laboratory and teaching practices (which are later reviewed and presented in the office as a thesis as well as doctoral dissertations of students of Faculty of Agriculture). Students are expected to write and present a written course practice and a laboratory practice which is commented during the course and at the end of the semester.

Seminars

The seminars of the student are required to create and submit a written paper (project, program, research paper), which is a result of the work performed in the laboratory, and which is submitted to the teacher. Students are expected to present and discuss their research work in the seminar. The seminars are held at the Faculty of Agriculture in Zagreb, in the same premises as the laboratory and teaching practices (which are later reviewed and presented in the office as a thesis as well as doctoral dissertations of students of Faculty of Agriculture). Students are expected to write and present a written course practice and a laboratory practice which is commented during the course and at the end of the semester.

Laboratory exercises

Laboratory exercises are conducted in small groups (average 4 students). The exercises are designed to practice laboratory work, and the results in a large number of groups for laboratory practices. Depending on the course, some exercises are conducted individually and are marked with a mark to evaluate the student's knowledge. The exercises are conducted in the laboratory, sometimes with students during the preparation and presentation of seminar topics. Through seminars, students have the opportunity to discuss the topics of the course and to present their own research work. The seminars are held at the Faculty of Agriculture in Zagreb, in the same premises as the laboratory and teaching practices (which are later reviewed and presented in the office as a thesis as well as doctoral dissertations of students of Faculty of Agriculture). Students are expected to write and present a written course practice and a laboratory practice which is commented during the course and at the end of the semester.
Evaluation of knowledge and examinations

Student knowledge can be assessed during the course and/or examinations.

(1) Course assessment

(2) Student knowledge is evaluated during the course and the results are published at the end of the semester.

(3) Course assessment is continuous; it can be conducted in seminars and laboratory classes.

(4) Course assessment is conducted in the second half of the academic year, in accordance with the established study program.

Exams and other forms of knowledge evaluation

Preliminary exam

Students are not entitled to undertake the course knowledge evaluation through collaboration in seminars. Preliminary exams are held in the second half of the academic year, in accordance with the established study program.

(1) Exams must be taken at a school with regulations determined by the curriculum.

(2) Timetables of finals, are published at the beginning of each academic year and the teachers are required to announce the dates of the finals.

(3) Course assessment is conducted in the second half of the academic year, in accordance with the established study program.

Final exam

The final exam is the assessment carried out in the reg-ular and irregular exam periods. Students can take the final exam only in the study programme, which is confirmed by the course coordinator’s signature.

Semester grades are determined according to the following criteria:

Final exam (80% of the final grade) and an oral exam (20% of the final grade).

Final exam (100% of the final grade) (exam or seminar classes).

Final exam (100% of the final grade) and an oral exam (20% of the final grade).

Student knowledge is evaluated during the course and the results are published at the end of the semester.

(3) Course assessment is continuous; it can be conducted in seminars and laboratory classes.

(4) Course assessment is conducted in the second half of the academic year, in accordance with the established study program.
