

Risk Management in Agriculture (152083)

Nositelj predmeta

[prof. dr. sc. Mario Njavro](#)

Opis predmeta

Risk and uncertainty in agribusiness has been area of intensive scientific interest during last few decades. Biological characteristics of agriculture together with the new business environment which includes globalisation and liberalisation of the food and agricultural markets, climate change, livestock epidemics and plant diseases as well as food safety and security demands additionally emphasise risk component in business. On the other side, risk taking is preconditions of the business success or profit is nothing but premium on risk. In that establishment and application of efficient agricultural risk management become imperative. Module through lectures, auditory practice (including case studies) and seminars gives overview of the modern risk analysis, risk management and decision management theory.

Module enables students to reach expertise level in the risk analysis, application of the decision theory and business modelling and give them with tools for rational, efficient and scientifically based decision making under uncertainty.

ECTS: **6.00**

Engleski jezik: **R3**

E-učenje: **R1**

Sati nastave: 60

Predavanja: 20

Vježbe u praktikumu: 15

Seminar: 25

Izvođač predavanja

- [prof. dr. sc. Mario Njavro](#)
- [dr. sc. Tajana Čop](#)

Izvođač vježbi

- [dr. sc. Tajana Čop](#)

Izvođač seminara

- [prof. dr. sc. Mario Njavro](#)

Ocjenjivanje

Dovoljan (2): 61-70%

Dobar (3): 71-80%

Vrlo dobar (4): 81-90%

Izvrstan (5): 91-100%

Uvjeti za dobivanje potpisa

Students must attend the lectures. Students should submit exercises in a timely manner and with the high level of quality

Opis

Written and oral exam. Seminar (Essay).

Vrsta predmeta

- Graduate studies / [MS Courses taught in English](#) (Izborni predmet, 1. semestar, 1. godina)

Opće kompetencije

Module qualifies students to critically evaluate risk and decision problems within the field of agribusiness; structurally and independently analyze risk and decide, create and suggest adequate risk management strategies

Oblici nastave

- Lectures
formal and informal lectures
- Auditory Exercises
use of software in risk analysis, mathematical programming and simulations
- Seminars
written and oral analysis of case studies in agribusiness

Ishodi učenja i način provjere

Ishod učenja	Način provjere
Critically evaluate risk and decision problems within the field of agribusiness;	Written and oral exam. Seminar
Structurally and independently analyze risk	Written and oral exam. Seminar
Decide, create and suggest adequate risk management strategies	Written and oral exam. Seminar or case study analysis

Način rada

Obveze nastavnika

The teacher should lecture in the scheduled time. Prepare and supply students with the teaching materials (readings, assignments, web pages, statistical databases and other relevant material). Communicate with the students via e-mail and e-learning platform Merlin.

Obveze studenta

Attend class. Solve practical problems by submitting reports in accordance with the deadline or by providing answers through e-learning system

Polaganje ispita

Elementi praćenja	Maksimalno bodova ili udio u ocjeni	Bodovna skala ocjena	Ocjena	Broj sati izravne nastave	Ukupni broj sati rada prosječnog studenta	ECTS bodovi
Lectures				33	33	1
Seminar	20%	0-60% 61-70% 71-80% 81-90% 91-100%	Nedovoljan (1) Dovoljan (2) Dobar (3) Vrlo dobar (4) Izvrstan (5)	25	47	1
1. partial exam	40%	0-60% 61-70% 71-80% 81-90% 91-100%	Nedovoljan (1) Dovoljan (2) Dobar (3) Vrlo dobar (4) Izvrstan (5)	1	50	2
2. partial exam	40%	0-60% 61-70% 71-80% 81-90% 91-100%	Nedovoljan (1) Dovoljan (2) Dobar (3) Vrlo dobar (4) Izvrstan (5)	1	50	2
Exam	80%	0-60% 61-70% 71-80% 81-90% 91-100%	Nedovoljan (1) Dovoljan (2) Dobar (3) Vrlo dobar (4) Izvrstan (5)		100	4
Total	100%	0-60% insufficient (1) 61-70% sufficient (2) 71-80% good (3) 81-90 very good (4)	(Exam*0.80)+(Seminar*0.20)	60	180	6

Elementi praćenja	Opis	Rok	Nadoknada
Seminar	Application of risk analysis and risk management strategies in the real-life situations in agribusiness		
1. partial exam	Cover topics of risk sources and risk analysis	First half of semester	Might try or repeat at the first date of the winter exam period
2. partial exam	Risk management strategies	End of semester	Might try or repeat at the first date of the winter exam period

Tjedni plan nastave

1. Introduction to risk in agriculture L - Risk and uncertainty; Sources of risk; A general approach to risk management in agriculture.
2. Decision analysis under uncertainty L - Probability theory; Risk measures; Decision trees; Efficiency criteria; Analysis using moments of the distribution; Stochastic efficiency methods.
3. Behaviour under risk L - Dominance; Utility as a basis for decision making; Utility functions; Information, processing capacity and judgment bias.
4. Simulation and mathematical programming models L - Stochastic simulation as a tool in decision analysis; Basic sampling techniques; Combining stochastic simulation and optimization. Mathematical programming approaches to whole-farm system planning under risk; Risk programming; Stochastic programming.
5. Risk and time L - Investment appraisal under uncertainty; Project feasibility analysis.
6. Risk management process L - Steps in risk management process; Analytic tools for assessment the effectiveness of risk management strategies.
7. On-farm risk management strategies L - Enterprise diversification; Portfolio theory.
8. Risk sharing strategies L - Insurance; financing; contracting; hedging on the commodity markets.
9. Risk considerations in agricultural policy making L - Government intervention and farm-level risk; Market failure for risk transfer; Emerging issues in risk management.
10. Computer labs Risk management in agriculture A - Practices using Excel: Decision tree, risk measures (expected utility, standard deviation, coefficient of variation), Bayesian statistics, utility. Introduction to @Risk software.
11. Modelling price and yield risk A - Modelling price and yield risk for crop and livestock products; Cumulative and probability density function.
12. Development of simulation models A - Stochastic budgeting models using Excel and @Risk.
13. Capital budgeting and risk 1 A - Implication of sensitivity and scenario analysis in investment appraisal; Stochastic decision trees for the analysis of investment decision. Case study 1.
14. Capital budgeting and risk 2 A - Capital structure, leverage and financial risk. Case study 2.
15. Insurance and portfolio analysis. State of affairs in risk management in agriculture. A, S - Effects of insurance and portfolio on business results. Case study 3. List of seminar topics: Risk analysis and food safety; Risk management and climate change; Risk and the environment; Innovative risk management tools (index insurance, weather derivatives).
